## The event professional's choice for long format card printing

Xtended card  
**ACTUAL SIZE!**  
5.51 x 2.12"

### Visible

The Magicard Rio Pro Xtended personalizes extra-long plastic cards for ticketing, accreditation and product labeling. Long format cards provide more design options and superior visibility and as such are widely used for security badges at sports and music events. Superior card printing quality is enhanced by ICC profiles that seamlessly map colors between software and the printer.

### Flexible

Cards up to 4.33" long can be printed entirely in full color using the double-printing mode. The printer can also handle pre-printed cards up to 5.51" long, printing a CR80-sized (3.38 x 2.12") area in full color in a single pass or an area up to 4.33 x 2.12" using double-printing. In monochrome mode, the entire length of a 5.51 x 2.12" card can be printed. The card feeder is adjustable from 3.38 to 5.51" length. Also available is a variant for 1.97" wide cards, typically used for product labeling.

### Secure

Magicard's patented HoloKote® security technology adds a watermark to the card as it is printed - it requires no additional consumables and can be customized to an individual logo design - enabling true security at no extra cost.

**3 year UltraCoverPlus warranty**  
The Rio Pro Xtended is supplied with a free, 3 year warranty with hassle-free printhead cover and loaner service.
